Conference this morning. Superintendent John O. Stanton will meet the "Chippers."

Yesterday the gates at the South mill bore a notice to the effect that all men wishing to return to work this morning might do so. Just what prompted the company to post the notice could not be learned, but from conversations with the men it is not likely that any of them will take advantage of the offer.

Conferences between the company and the men are under way and it is said, determined to follow the differences will be settled before many days. The "chippers," who were the first to strike and who virtually have caused the closing of the mill were asked to meet with Superintendent John O. Stanton yesterday.

For some reason unexplained only a few of them got around. Another effort will be made to have a conference at 11 o'clock this morning. All of the thirty-two "chippers" will be on hand at that hour the men say.

The other employees who quit have, it is said, determined to follow the example of the "chippers" and refuse to go back except at the old scale. A "gagger" in conversation with a Tribune reporter yesterday said the men in his department were willing to meet the company halfway, if the "chippers" can be induced to resume work. He for one was willing to turn in and get the mill started again, providing the company would agree to arbitrate as speedily as possible. He did not know how many others felt as he did.

TWAS A FALSE ALARM.

Charles Kirt neglected to have his key released. The alarm of fire which was sent in from box 53 last evening at a few minutes before 12 o'clock was a false one.

This did not appear on the engine house indicator and Kirt failed to notify the district chief and get his key released. Some one who saw the key in the box turned in an alarm and then ran away.

Twelve witnesses examined. Only one bad vote was discovered yesterday.

Remarkable railroading. Record made by the Lehigh Valley's Fast Flyer.

The Railway Age gives from train sheets furnished by Superintendent O. G. Esser the record made by the Black Diamond express on its remarkable run made in April last. The run on the trip from Falling Springs to Sayre was made by Engineer A. E. Mason on 665, and from Sayre to Manchester by Engineer W. Owens on 668. The speed in view of the heavy curves, is almost appalling.

From Falling Springs to Tunkhannock the rate of speed was 69.5 miles per hour, while on the Seneca division, where the road is straighter and more level, the speed was 79.9 miles per hour, or a mile and a third a minute. The schedule running time, allowing four minutes each for stops at Laceyville and Geneva, on the North Branch, was 22.5 miles per hour, and on the Seneca 22.2 miles an hour.

The record (in the judgment of the Railway Age) is a remarkable one—especially the run from Sayre to One-pine, when 42.96 miles was made in 23 minutes, or at the rate of 79.9 miles an

hour. This compares very closely with the fastest sprint on the famous Lake Shore run of October, 1885, when 33 miles were made at the rate of 80.6 miles an hour, and 42 miles at the rate of 79.04 miles an hour.
